Reporting Period: July 1 – December 31, 2015
Title V Operating Permit No. 23-00003

Dear Mr. Rebarchak:

In accordance with 40 CFR 60, Subpart Db - Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units ("NSPS Db"), the Monroe Energy, LLC Trainer Refinery hereby submits the semi-annual compliance reports (per §60.49b(i)) for Boilers 9 and 10. The following table summarizes all of the information required by §60.49b(i), and briefly addresses each requirement:

Reporting Requirement	Comment
The average hourly NO _x emission rates (expressed as NO ₂) (ng/J or lb/MMBtu heat input) measured or predicted.	Boiler 9: The measured average hourly NO _x emission rates are attached. – Attachment I Boiler 10: The measured average hourly NO _x emission rates are attached. – Attachment I
The 30-day average NO _x emission rates (ng/J or lb/MMBtu heat input) calculated at the end of each steam generating unit operating day from the measured or predicted hourly nitrogen oxide emission rates for the preceding 30 steam generating unit operating days.	Boiler 9: The measured 30-day average hourly NO _x emission rates are attached. – Attachment I Boiler 10: The measured 30-day average hourly NO _x emission rates are attached. – Attachment I
Identification of the steam generating unit operating days when the calculated 30-day average NO _x emission rates are in excess of the NO _x emissions standards under § 60.44b, with the reasons for such excess emissions as well as a description of corrective actions taken.	Boiler 9: There were no emission exceedances during the reporting period. – Attachment I Boiler 10: There were no emission exceedances during the reporting period. – Attachment I

Reporting Requirement	Comment
Identification of the steam generating unit operating days for which pollutant data have not been obtained, including reasons for not obtaining sufficient data and a description of corrective actions taken.	<p>Boiler 9: All periods for which pollutant data have not been obtained are identified in the attached. – Attachment III</p> <p>Boiler 10: All periods for which pollutant data have not been obtained are identified in the attached. – Attachment III</p>
Identification of the times when emission data have been excluded from the calculation of average emission rates and the reasons for excluding data.	<p>Boiler 9: All periods when emissions data have been excluded, and the reasons for exclusion are identified in the attached. – Attachment III</p> <p>Boiler 10: All periods when emissions data have been excluded, and the reasons for exclusion are identified in the attached. – Attachment III</p>
Identification of "F" factor used for calculations, method of determination, and type of fuel combusted.	<p>Boiler 9: The boiler fired only refinery fuel gas during the reporting period. The F Factors used for calculation are summarized in the attached, and are calculated using data from an online gas chromatograph and using U.S. EPA Method 19, equation 19-13. – Attachment II</p> <p>Boiler 10: The boiler fired only refinery fuel gas during the reporting period. The F Factors used for calculation are summarized in the attached, and are calculated using data from an online gas chromatograph and using U.S. EPA Method 19, equation 19-13. – Attachment II</p>
Identification of the times when the pollutant concentration exceeded full span of the CEMS.	<p>Boiler 9: There were no periods when the pollutant concentration exceeded full span of the CEMS.</p> <p>Boiler 10: There were no periods when the pollutant concentration exceeded full span of the CEMS.</p>
Description of any modifications to the CEMS that could affect the ability of the CEMS to comply with Performance Specification 2 or 3.	<p>Boiler 9: There were no modifications made to the CEMS that could affect its ability to comply with PS-2.</p> <p>Boiler 10: There were no modifications made to the CEMS that could affect its ability to comply with PS-2.</p>
Results of daily CEMS drift tests and quarterly accuracy assessments as required under Appendix F, Procedure 1 of this part.	<p>Boiler 9: The results of the required drift tests and accuracy assessments are attached. – Attachment III</p> <p>Boiler 10: The results of the required drift tests and accuracy assessments are attached. – Attachment III</p>
